

Omani Trade & Friendship Exhibition

The **tourism** exhibition featured Oman's ancient history, its present and its future, through a series of interactive exhibits, photographs and immersive full dome films.

The **Exhibition** was held at the Asian Civilisation Museum, in Singapore's trade and tourism district.

A **highlight** of the Exhibition was the safe arrival of the majestic Jewel of Muscat, a working replica of a 9th century Omani ship, given by the government of Oman to the people of Singapore.

LM Productions were commissioned to provide two inflatable structures for the Exhibition. The first being an inflatable Cuboid venue; a double skinned air supported structure, which housed a range of exhibits from Oman. This first structure was linked via a covered walkway to a 10m StratoSphere.

The **StratoSphere** was used as an immersive cinema in which audiences could watch high definition full dome video about the Omani Renaissance. LMP produced the video using 360 degree footage.
